Dear Clint:

Hope this finds you well – I am sure you are BUSY!

Could not help but remember when we saw the latest news (<https://www.epa.gov/newsreleases/daily-caller-scott-pruitt-will-end-epas-use-secret-science-justify-regulations>) the many constructive discussions we had had when you were at House Science about the opportunities to enhance data sharing. Though I am sure you are occupied with many things, I thought you should know we are very much still on the case, trying to make our data available – and educating the scientific community about the need to do so. We actually had already planned an entire session at our Annual Conference in Chicago in late April on “Reproducibility in Environmental Health Research” and are pleased to have Steve Goodman, who authored the attached with John Ioannidis to lead off in the session. If there is someone there who you think could benefit from attending, please let us know and we can help facilitate that...

And in the meantime, if there are ways that we might help in identifying the opportunities and the potential snags in this new initiative, please let us know...

All the best!  
Dan
